POSITIONING MATTERS

At Positioning Products, we believe that everyone deserves to feel good in their body, live a healthy life, and enjoy comfort. Therefore, by paying attention to the details and listening to our clients and users, we design durable, high-quality, good-looking belts and harnesses that improve the health of wheelchair users.

EMPOWERING LIFES

At Positioning Products, we are committed to enhancing the lives of wheelchair users through thoughtfully designed positioning solutions.

Our products are developed to support a healthy, functional seating posture by providing anterior postural support. A good posture helps conserve energy throughout the day and contributes to overall wellbeing.

We believe belts, harnesses and other positioning products are essential components of a seating system. Rather than using energy to maintain posture, users should be able to focus on their daily activities. Our positioning products help accommodate or correct postural deviations, promoting comfort, stability and improved quality of life.

QUALITY MATERIALS. FUNCTIONAL DESIGNS. SAFE USE.

At Positioning Products, our belts and harnesses are built for durability, safety and ease of use. Designed with attention to every detail and a focus on aesthetic appeal. Our dedicated team understands that product quality directly impacts user safety. That's why components are carefully considered; Buckles for example are a key element in all our products, most of them are covered with a pocket to protect the user from their hard edges.

The harnesses have a grip print on their inner side to secure the product's correct position on the person's body and prevent unintentional movements. All Positioning Products are made from water and dirt repellent materials, ensuring longevity. When it comes to easy of use, it is essential to highlight that the webbings on our products have rounded edges and a trim strip, guaranteeing their seamless and precise mounting on any wheelchair.

HAVING A GOOD SEATING POSTURE STARTS WITH POSITIONING THE PELVIS, WHICH IS THE BASIS OF SEATING

Incorrect seating posture can negatively affect a person's body, and could lead to pain and poor circulation, digestion, and breathing.

The initial step to good posture is to properly fit the wheelchair to the user's needs, which requires providing support under the sitting surface. This can be achieved by matching the size of the seat, matching the correct height and width of the backrest and by matching leg-, arm- and if needed head support.

However, sometimes, the wheelchair alone cannot solve users' postural deviation. Therefore, we have designed a wide range belts and harnesses, which can further assist in positioning the user.

Our Hip Belts come with various buckles and are either single or double-adjustable. The Hip Belts tackle problems like:

- + Posterior Pelvic Tilt
- + Anterior Pelvic Tilt
- + Pelvic Rotation
- + Pelvic Obliquity

HIP POSITIONING

2-POINT

HIP BELTS

HOW TO MEASURE

POSTERIOR PELVIC TILT

The distance from the lateral side of one thigh to the lateral side of the other thigh shall be measured with a flexible tape measure.

ANTERIOR PELVIC TILT

For a support managing anterior pelvic tilt, the distance from one lateral side of the pelvis horizontally level with the ASISs to the other lateral side at the same level shall be measured with a flexible tape measure.

INTERESTED IN OUR POSITIONING PRODUCTS?

Would you like to learn more about our positioning products and how they can improve seating posture? We'd be happy to share more information. If interested, a product specialist can visit you to demonstrate the benefits and possibilities of our products and discuss important considerations for mounting and placement.

We're look forward to exploring the possibilities together.

DEDICATED TO DELIVERING TOP-QUALITY

ISO 9001 is the international standard that specifies requirements for a quality management system (QMS).

Organizations use the standard to demonstrate the ability to consistently provide products and services that meet customer and regulatory requirements. Our manufacturing facility is compliant with this standard. Thus, ensuring the superior quality of all our products. We promise to continue to provide you with the best positioning products available.
